NURIT[®] 2059i

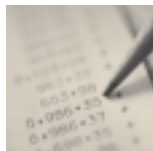

Integrated Transaction Register

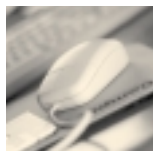

THE COMPLETE, SINGLE-DEVICE RETAIL TRANSACTION SOLUTION WITH INTERNET-BASED BACK-OFFICE SUPPORT

Retail point-of-sale countertop space is prime commercial real estate. And, as anyone in the business can tell you, every square inch counts. There's just no room for a clutter of independent transaction devices, each handling only a limited aspect of today's multiple purchase formats: cash, checks, credit, debit EBT and smart card transactions. Retailers require an intelligent device that integrates all transaction functions into one robust, intuitive and easy-to-use solution. Furthermore, using the optional barcode scanner allows faster checkout and minimizes cashier errors. The 2059i can also accept an additional plug-in card to support expanded communication capabilities to connect to future networks or peripherals. Enhanced by powerful Web-based business management applications, such a register would allow smaller retailers to benefit from the software functionality that larger department stores utilize. Imagine all of this in a highly affordable, minimal footprint register. Then think about Lipman... and the proven NURIT Family of transaction-enhancing solutions.

AN INTEGRATED WEB-BASED REGISTER RINGS UP VALUABLE REWARDS

- Works as an all-in-one standalone solution or can be easily linked within a larger network, as in franchise, chain or other multi-location environments.
- A series of Web-based back-office applications extend value beyond the traditional electronic cash register:

- Price Look-Up (PLU) File Management
- Inventory Control and Management
- Accounting Functions, with Multi-Journal Capability
- General Business Management
- Staff Management with Employee Time Card Capability

NURIT APPS[™]

- Customizable software lets you develop applications for doing business your way.
- Simple and intuitive menu-driven interface keeps operations fast and easy
- A time and attendance time clock application can be easily implemented.
- Handles multiple payment types and value-added applications, such as pre-paid cards, loyalty/gift cards, smart cards and proprietary cards.

TransAction Solutions[™]

NURIT[®] 2059i

Integrated Transaction Register

HELPING BUSINESSES REGISTER SUCCESS

The NURIT 2059i Integrated Transaction Register, complete with Internet-enabled back-office support, provides everything today's point-of-sale environment demands in a smart, all-in-one, retail transaction solution. Add a compact footprint that handles all of your transaction needs on one easy-to-use device, and the NURIT 2059i becomes your in-store total transaction control center. It comes complete with business management applications that are accessible over the Web.

SMALL MERCHANTS TRANSACT BIGGER BUSINESS

Ever wished you had access to the business applications large department stores have at their fingertips, without having to pay for expensive full-featured management applications? **Lipman makes such access possible with the NURIT 2059i, where the "i" not only stands for Internet-enabled, but also for downright Intelligent.** Cash in on Lipman's Web browser-accessible back-office software to perform a variety of key retail management functions, including monitoring and managing stock, looking up pricing, posting accounting entries with multi-journal support, maintaining clients, even keeping track of staffing hours through employee time card management. Lipman takes the traditional cash register model to a whole new level of productivity and performance.

AFFORDABILITY ADDS TO YOUR PROFITABILITY

The NURIT 2059i is not only a cost-effective solution because of its integrated all-in-one design, but it's also quite affordable in and of itself. It is expressly designed for smaller retail operations, whose modest capital expenditure budgets don't stop such entrepreneurial merchants from holding their businesses to higher and more demanding standards of performance. The NURIT 2059i also attracts multi-location franchisees, such as temporary tenants, cart operators and seasonal businesses that need cost-effective registers than can deliver quality, security and dependable performance. Lipman understands these management needs and delivers a powerful solution.

Be sure to ask your service provider how the NURIT 2059i Integrated Transaction Register can satisfy your demanding customers' needs today and tomorrow, while improving your business performance. To find out more about the complete NURIT Family of transaction-enhancing solutions, call your service representative, call Lipman toll-free at 1-800-454-7626 or visit us at: www.lipmanusa.com
