

PRINTPAK 350

Now you can create the compact solution you need for the countertop—and watch the first receipt print out in a quiet three seconds. An industry first.

It's the complete payment solution. It provides fast, legible receipts. A complete audit trail for easy end-of-day balancing. And it fits into one compact space.

You have it all. Yet you still maintain the flexibility of separate units.

It starts with the PRINTPAK™ 350. This new printer module contains a quiet thermal mechanism that sets the industry standard for speed as it prints crisp, clear receipts.

Pick The Solution You Need

The printer module fills the bill if you use the 300 series of OMNI™ or TRANZ® terminals. The available selections also include the ZON® Jr XL. Whatever model, they all fit easily into the PRINTPAK 350.

And the choices don't stop with the terminal. For your high-speed printing, the PRINTPAK 350 can emulate both the VeriFone® PRINTER 250 and 900 text applications. No application changes are needed.

It's As Simple As That

When you're done, your combination matches the best integrated terminal/printers. It's an efficient unit that uses minimum counterspace. And does it while creating a more professional appearance on the countertop.

The Convenience Of A Module

Of course, the PRINTPAK 350 is a module. So you can change your mind. To add debit capability or a graphic display, simply trade up to a new terminal and snap it into the PRINTPAK 350.

Because the units operate separately, the PRINTPAK 350 can be repaired without affecting the terminal. And the thermal printer has few moving parts, so there's seldom need for repair. What's more, you can forget about ribbons forever.

Let's Build The Model You Need

Use the PRINTPAK 350 to build the integrated solution you need. Or just add the printer to your existing terminal. Your VeriFone sales representative can provide the details.

PRINTPAK 350

Features

- Interfaces with a variety of VeriFone terminals
- Speeds up transaction time through fast printing
- Operates quietly
- Emulates the VeriFone PRINTER 250 and PRINTER 900
- Operates reliably because of simple mechanism
- Saves counterspace through compact design
- Prints without ribbons
- Presents uncluttered professional image
- Creates crisp, legible characters
- Continues to process transactions if printer repair is needed
- Produces long-lasting receipt image

Specifications

Hardware

Height	4.3 in (108.4 mm)
Width	5.7 in (143.9 mm)
Depth	12.2 in (310.1 mm)
Shipping Weight	4.7 lb (2.2 kg)
Operating Temperature	32° to 104° F (0° to 40° C)

Printing

Technology	Thermal, fixed printhead
Speed	12.5 lines per second in text mode
Buffer	64 bytes
Copies	Switch selectable, 1, 2 or 3
Printhead Life Expectancy/ Mechanical Reliability (MCBF)	4 million lines
Standard Characters	10 international character sets Graphic printing capability

Paper

Size	2.2 in (57 mm) wide standard roll, single ply
Format	42-column, portrait—for PRINTER 250 emulation 32-column, portrait—for PRINTPAK 300 emulation 24-column, portrait—for PRINTPAK 300 emulation

Interface

Serial	RS-232C compatible
Baud Rate	Switch selectable; 1200, 2400, 4800 and 9600 baud

Power

Voltage	120 VAC, 47-63 Hz (±10%) or 230 VAC, 50 Hz
