

P8 Printer

faster, smaller, quieter printing from Hypercom

Hypercom® P8 family printers offer higher performance, greater reliability and lower operating costs, making them superior to any other printer on the market.

P8 Features:

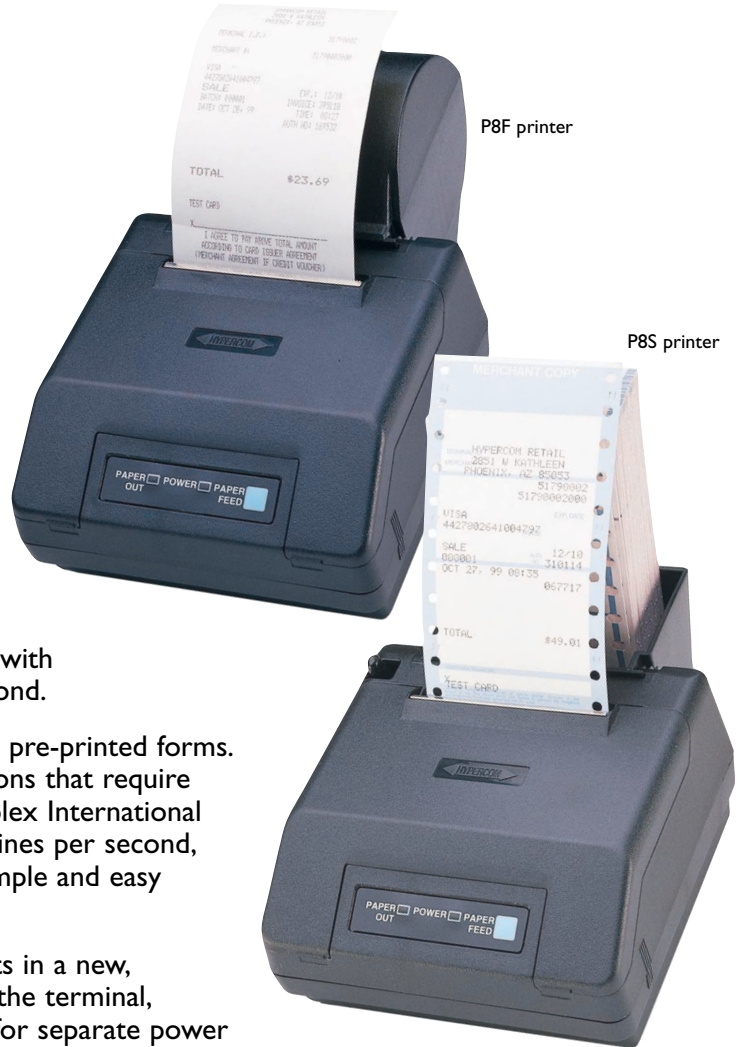

- Bi-directional printing improves print speeds
- Quiet operation
- Easy-to-load pre-printed or plain roll paper
- Paper Out and Power indicator lights
- Extra wide 3-inch roll
- Small footprint
- Compatible with all Hypercom T7 terminals

P8 printers are available in either 40-column friction feed (P8F) or 23-column sprocket feed (P8S) models, making them a sensible choice for printing credit card vouchers.

The P8F roll printer helps speed transaction times with rapid paper advance at the rate of 13 lines per second.

The P8S sprocket feed printer provides printing on pre-printed forms. These are particularly suitable for custom applications that require printing of large amounts of standard text or complex International character sets. With paper advanced at a rapid 16 lines per second, customers are not kept waiting. Paper loading is simple and easy with both Hypercom printers.

In addition, both P8 printers provide quality receipts in a new, compact, quiet design. P8 printers are powered by the terminal, eliminating the need for separate power supplies and outlets.

P8F printer in a retail environment
